

MORDHEESHVARA B

Puducherry, India | +91 7200160095 | mordheeshvarab@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence & Data Science with hands-on experience building full-stack AI-powered platforms on AWS. Proficient in Python, Flutter, Next.js, and cloud-native architectures. Delivered production-grade projects spanning cloud security compliance, e-commerce, accessibility automation, and machine learning prediction systems. Recognised as a Smart India Hackathon national finalist.

TECHNICAL SKILLS

Programming Languages: Python, Dart, JavaScript, SQL

Frameworks & Libraries: Flutter, React.js, Next.js, FastAPI, Pandas, NumPy, Matplotlib, Scikit-learn

Cloud & DevOps: AWS (Lambda, API Gateway, IAM, S3, CloudWatch, EC2, STS AssumeRole), Boto3, Vercel, AWS Amplify

Databases: PostgreSQL, MySQL, Supabase

AI / ML: Machine Learning, Predictive Modelling, Data Analysis, Workflow Automation (n8n), MCP Orchestration

Security & Compliance: Cloud Security Auditing, CIS, ISO 27001, SOC 2, PCI-DSS, HIPAA, GDPR, NIST, WCAG

Tools & Platforms: Git, GitHub, Figma, REST API Integration, WordPress

PROJECTS

AI-Powered Cloud Security Auditor Platform | Full Stack & Cloud Security Developer

2025 – 2026

- Built an enterprise-grade cloud security auditing platform using FastAPI (backend), Next.js (frontend), PostgreSQL, and AWS to enable read-only security analysis of AWS accounts.
- Implemented secure cross-account access via AWS STS AssumeRole and Boto3, allowing safe, credential-free auditing of cloud resources without storing customer secrets.
- Integrated AI-generated compliance recommendations mapped to CIS, ISO 27001, SOC 2, PCI-DSS, HIPAA, GDPR, and NIST frameworks, delivering actionable remediation steps.
- Designed MCP (Model Context Protocol) orchestration layer to coordinate AI agents across audit workflows, with security guardrails preventing destructive operations.
- Implemented end-to-end audit logging and compliance mapping, producing exportable reports for governance and regulatory review.

Tech Stack: FastAPI, Next.js, PostgreSQL, AWS (STS, IAM, Boto3, S3, CloudWatch), MCP, Python

Buylo — Premium E-Commerce Platform | Full Stack Developer

2025

- Built a luxury-inspired e-commerce platform using Next.js and React, featuring real-time inventory management, secure transaction workflows, and cloud-based asset delivery.
- Implemented smooth, high-fidelity UI animations with Framer Motion, delivering a premium shopping experience with transitions that reduce perceived load time.
- Designed a responsive, component-driven architecture ensuring pixel-perfect layouts across mobile, tablet, and desktop breakpoints.
- Optimised core web vitals and asset delivery via cloud CDN integration, achieving fast initial load and scalable asset serving.
- Built secure payment and checkout flows with validation, error handling, and order confirmation state management.

Tech Stack: Next.js, React, Framer Motion, Vercel, Cloud CDN, REST APIs

Cloud-Based AI Resume Role Prediction System | Cloud & Backend Developer

Jan 2026

- Developed a serverless machine learning application that analyses resumes and predicts suitable job roles using trained ML models deployed on AWS.
- Designed REST APIs using AWS Lambda and API Gateway to process user inputs and return role predictions securely at scale.
- Configured IAM policies and S3 storage for model deployment and execution; monitored system performance with AWS CloudWatch.

Tech Stack: Python, AWS Lambda, API Gateway, IAM, S3, CloudWatch, Scikit-learn

AI Accessibility Compliance Automation Platform | Full Stack Developer Aug 2025

- Built an AI-powered platform that automatically detects accessibility issues in HTML, PDF, and DOCX files against WCAG standards.
- Designed automated compliance validation workflows using n8n for AI orchestration and integrated dashboards for tracking accessibility scores and issue trends.
- Deployed frontend on Vercel and integrated backend cloud services with REST APIs for seamless file processing.

Tech Stack: React.js, Python, n8n, Supabase, Vercel, REST APIs

AI Designer — Generative Feature Builder | AI/ML Developer Jun 2025

- Developed a generative AI web tool that converts user prompts into structured application feature suggestions with intelligent UI layout recommendations.
- Implemented real-time rendering of UI prototypes using HTML, CSS, and JavaScript; deployed on Vercel for fast, scalable hosting.

Tech Stack: JavaScript, HTML/CSS, AI APIs, Vercel

Student Result Prediction Dashboard | Python Developer May 2024

- Developed a predictive analytics dashboard forecasting student performance from attendance and study pattern data using classification and regression ML algorithms.
- Visualised insights using Matplotlib; performed data preprocessing with Pandas and NumPy.

Tech Stack: Python, Pandas, NumPy, Matplotlib, Scikit-learn

EDUCATION

B.Tech in Artificial Intelligence & Data Science 2023 – Present
Sri Manakula Vinayagar Engineering College, Puducherry | CGPA: 6.7

Higher Secondary Certificate (HSC) 2022 – 2023
Petit Seminaire Higher Secondary School, Puducherry | 67%

CERTIFICATIONS

- AWS Academy Cloud Foundations
- AI & ML Virtual Internship — Oracle (Eduskills)
- ChatGPT Prompt Engineering for Developers — DeepLearning.AI
- Learn Prompting: ChatGPT for Everyone

ACHIEVEMENTS

- **Smart India Hackathon (SIH) Finalist** — Selected among the top 100 teams nationally out of 10,000+ submissions.

LANGUAGES & SOFT SKILLS

Languages: Tamil (Fluent) | English (Fluent) | French (Basic / Intermediate)
Soft Skills: Analytical Thinking | Problem Solving | Debugging Mindset | Adaptability | Team Collaboration
